### EXPERTS IN BIOCHEMISTRY, NUTRITION & BIOANALYSIS

Food & Nutrition

Pharmaceuticals

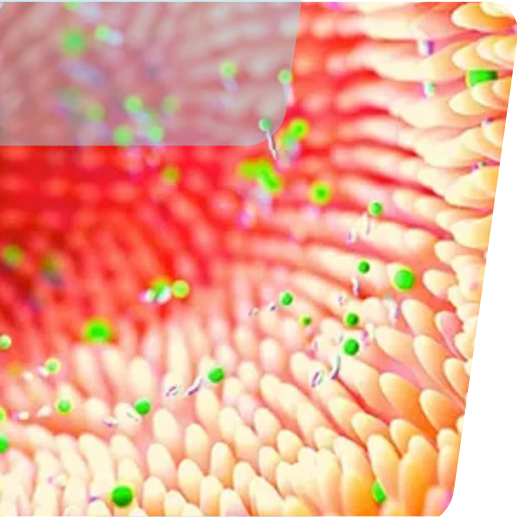

Biotechnology

Feed

# 3 platforms

dedicated to service and development contracts  
with private and academic institutions  
in the field of lipids, vegetable proteins & micronutrients

## BIOASSAYS

Support for your development by evaluating your products from the digestion stage through to metabolic and clinical results.

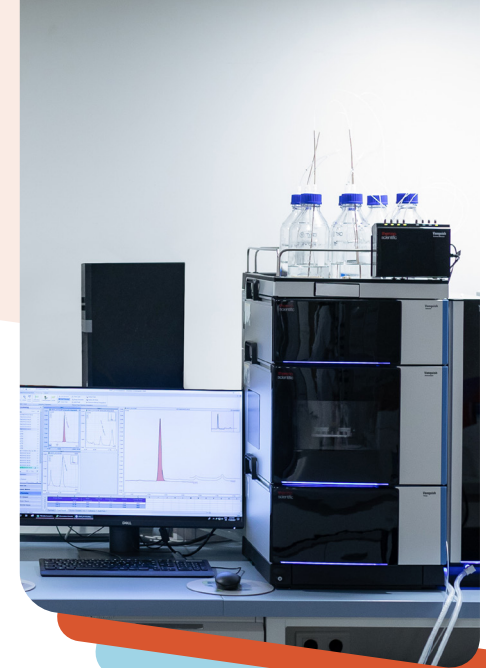

- Digestion studies
- Absorption & transport studies
- Metabolic and nutritional interventions
- Biological activity

## ANALYTICS

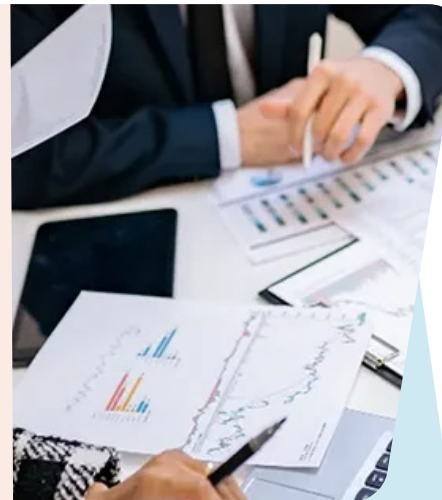

High-quality analytical services for the quantification of nutrients and their metabolites in various types of biological samples from preclinical and clinical studies.

- High-throughput fatty acid analysis
- Targeted lipid metabolite analysis
- Method development & validation

We cover every single step of your product development, from the design of customized in vitro or in vivo studies, to the analysis of bioactive compounds in biological samples, and the development of scientific papers, communication materials for your customers or partners.

*“ Our passion is to provide services and expert scientific support to your team all along the Research & Innovation journey.”*

## SCIENTIFIC SUPPORT

Support for your innovation process, from the review and development of scientific and technical evidence to the activation of your data in scientific communications.

- Literature review
- Scientific dossier & communication assets
- Scientific communication & medical writing
- Training
