

## Environment & Eco-industries

▶ **Towards a synergy of your industrial and environmental performances**

### ▶ **A dual expertise**

#### ▶ **Environmental assessment**

Identification and quantification of the impacts on ecosystems

Transferring our skills developed through advanced research

#### ▶ **Transformation and valorization of biomass**

Chemicophysical and biotechnological transformation of biomass

Vegetable proteins, oils and derivatives

▶ **Achieving sustainability of agriculture, food and chemical industries**

### ▶ **From upstream to downstream**

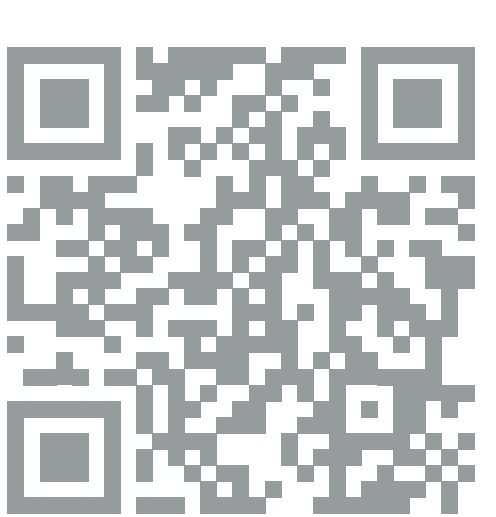

- Comparatives studies
- Sourcing of your raw materials
  - Your processes
  - Your finished products
  - Valorisation of your co-products

### ▶ **From lab to plant**

- Assessment of innovative bioproducts
- Environmental footprint of your facilities
- Eco-design of processes, plants, industry

### ▶ **Mono-& Multi-Criteria Tools**

- Bilan Carbone®
- Life Cycle Assessment
